

CONTENTS

Abstract.....	1
Introduction	2
Purpose and Scope.....	5
Previous Investigations	5
Acknowledgments	6
Description of the Study Area	6
Climate.....	6
Topography and Geology	7
Land Use and Population.....	7
Methods of Study.....	7
Stream Monitoring Network and Water-Quality Sample Collection.....	7
Bacteria Sampling and Analyses	9
Bacteria Survival in Shoal Creek.....	9
Bacteria Transport in Shoal Creek.....	10
Bacteria Survival in Land-Applied Poultry Litter	13
Survival and Transport of Fecal Bacteria in Shoal Creek.....	13
Bacterial Survival	16
Travel Times of Bacteria in Shoal Creek.....	17
Distribution of Fecal Bacteria and Nutrients.....	18
Sources of Fecal Bacteria in Shoal Creek	25
Detailed Seepage Study	25
Distribution of Wastewater Organic Compounds and Pharmaceutical Compounds	28
Genetic Identification of Fecal Bacteria	30
Occurrence and Survival of Fecal Bacteria in Land-Applied Poultry Litter	31
Summary and Conclusions	36
References	38

FIGURES

1. Map showing location of the upper Shoal Creek Basin study area and Missouri Department of Natural Resources beneficial-use designations for Shoal Creek	3
2. Map showing location of U.S. Geological Survey sampling sites, land use, and distribution of poultry barns in the study area.....	4
3. Schematic diagram of a diffusion chamber used to measure bacteria survival	11
4. Photograph showing Shoal Creek upstream from State Highway W at site 2 immediately after the injection of fluorescent dye at 1828 hours on July 23, 2001	12
5. Photograph showing fluorescent dye mixing in pool downstream from the State Highway W bridge (site 2) at 1840 hours on July 23, 2001	12
6. Schematic diagram showing generalized layout of a poultry litter field test plot.....	14
7. Photograph showing the steel cylinder used to collect slurry-water samples from a test plot immediately after the land application of poultry litter	15
8. Photograph showing poultry litter being applied at field test plot P-2, May 7, 2002	15
9. Graphs showing measured fecal coliform and <i>Escherichia coli</i> densities in diffusion chambers at sites 2 and 3 on Shoal Creek, July 23 to 26, 2001	16
10. Graph showing concentrations of rhodamine-WT dye in water samples from the main stem of Shoal Creek, July 23 to 26, 2001	19
11. Boxplot showing fecal coliform and <i>Escherichia coli</i> densities in water samples from Shoal Creek and tributary sites during the July 2001 dye-trace study	20
12. Graphs showing variation of <i>Escherichia coli</i> densities and rhodamine-WT dye concentrations at main stem sites on Shoal Creek, July 23 to 25, 2001	23
13. Boxplot showing results of statistical tests of predicted and measured loads of fecal coliform and <i>Escherichia coli</i> at selected sites during the July 2001 dye-trace study	24
14. Photograph showing discharge and fecal bacteria densities measured during the detailed seepage study between sites 2c and 3, August 27, 2002	27
15. Graph showing percentage of <i>Escherichia coli</i> isolates in water samples collected from Shoal and Pogue Creeks matched to a major source group.....	30
16. Graphs showing median densities of fecal coliform and <i>Escherichia coli</i> bacteria, total daily precipitation, and mean daily air temperature at the poultry litter field plots.....	35

TABLES

1. Densities of fecal coliform and <i>Escherichia coli</i> bacteria in diffusion chambers placed in Shoal Creek at sites 2 and 3, July 23 to 25, 2001	17
2. Summary of travel times and dye quantity recovered from selected sites during the July 2001 dye-trace study	18
3. Discharge, physical properties, and densities of fecal coliform and <i>Escherichia coli</i> in water samples collected from Shoal Creek and selected tributary sites during the July 2001 dye-trace study.....	21
4. Physical properties, nutrient concentrations, and densities of fecal coliform and <i>Escherichia coli</i> bacteria in surface- and ground-water samples collected during July 2001 and August 2002.....	26
5. Concentrations of wastewater organic compounds and selected pharmaceutical compounds in surface- and ground-water samples collected during July 2001 and August 2002.....	29
6. Description of litter application test plots and initial fecal coliform and <i>Escherichia coli</i> densities in poultry litter	32
7. Densities of fecal coliform bacteria in slurry-water samples from test plots of land-applied poultry litter	33
8. Densities of <i>Escherichia coli</i> bacteria in slurry-water samples from test plots of land-applied poultry litter	34

APPENDIX

A. Concentration and estimated cumulative dye load of rhodamine-WT dye at selected sites on Shoal Creek during the July 2001 dye-trace study	43
--	----

HORIZONTAL DATUM

Horizontal coordinate information is referenced to the North American Datum of 1927 (NAD 27). NAD 27 can be converted to the North American Datum of 1983 (NAD 83) by using the National Geodetic Survey conversion utility available at URL <http://www.ngs.noaa.gov/TOOLS/Nadcon/Nadcon.html>.

VERTICAL DATUM

Vertical coordinate information is referenced to the National Geodetic Vertical Datum of 1929 (NGVD 29). Elevation, as used in this report, refers to distance above or below NGVD 29. NGVD 29 can be converted to the North American Vertical Datum of 1988 (NAVD 88) by using the National Geodetic Survey conversion utility available at URL <http://www.ngs.noaa.gov/TOOLS/Vertcon/vertcon.html>.
